ABSTRACT

This report presents current aggregate and disaggregate data on the dropout rates for grades 7 through 12 in the Texas public schools, along with projected dropout rates for these grades over the next 5 years. The number of dropouts and the dropout rate have declined significantly since 1987-88, the first year of dropout reporting. In that year, the dropout rate was 6.7 percent. The rate for 1992-93, calculated by the same method, was 3.3 percent. Current methodology, a more accurate reflection of dropouts, produces a dropout rate of 2.8 percent for the 1992-93 school year. Although this decline is evident for all student groups, the dropout rate remains high for African Americans and Hispanics. However, the gap between minority and white student dropout rates has narrowed from 3.4 percentage points in 1987-88 to 2.2 in 1992-93. Analysis reveals that 50 percent of dropouts had not been identified as at-risk the year they dropped out, and that 75 percent were overage for grade. Districts and schools in urban areas have higher dropout rates regardless of school size. Three appendixes provide details in tabular form for districts by previous and current methodology and dropouts by education service center region. Twenty charts illustrate the text. (Contains seven references.) (SLD)

TEXAS
EDUCATION
AGENCY 1701 NORTH CONGRESS AVENUE • AUSTIN, TEXAS 78701-1494 • (512) 463-9734

January 1995

The Honorable George W. Bush, Governor of Texas
The Honorable Bob Bullock, Lieutenant Governor of Texas
The Honorable Pete Laney, Speaker of the House

Texas Education Code §11.205(d), Dropout Reduction Program, requires the Central Education Agency to submit a report each odd-numbered year that includes the current dropout rate and projected cross-sectional and longitudinal dropout rates for Texas. This report presents current aggregate and disaggregate data on the dropout rate of students in grades 7-12, along with projected dropout rates for these grades over the next five years. The required state plan to reduce the dropout rate is provided in a separate document.

The number of dropouts has declined significantly since 1987-88, the first year of dropout reporting. The dropout rate over this period has also reflected dramatic declines. This decline in number is evident for all student groups over the last six years; however, the dropout rate of both Hispanics and African Americans remains high. However, the gap between the minority and white student dropout rates has narrowed since 1987-88 from 3.4 percentage points to 2.2 in 1992-93 due primarily to a reduction in the number of minority dropouts.

The Central Education Agency is pleased to submit the *1992-93 Report on Public School Dropouts*.

Respectfully submitted,

Lionel L. Meno

Report on Texas Public School Dropouts — 1992-93

Executive Summary

The number of dropouts has declined significantly since 1987-88, the first year of dropout reporting. The dropout rate over this period has also reflected dramatic declines. The dropout rate was 6.7 percent in 1987-88. The dropout rate for the 1992-93 school year may be reflected in two methods of dropout calculation. The previous or old method of calculating dropouts, which is comparable to prior years, produces a dropout rate of 3.3 percent. The current or revised dropout methodology, which is less comparable to prior years but provides a more accurate reflection of dropouts, yields a dropout rate of 2.8 percent for the 1992-93 school year. The decline in the number of dropouts is evident for all student groups over the last six years; however, the dropout rate of both Hispanics and African Americans remains high. In spite of this, the gap between the minority and white student dropout rates has narrowed since 1987-88 from 3.4 percentage points to 2.2 in 1992-93, due primarily to a reduction in the number of minority dropouts.

An examination of the characteristics of dropouts and their education programs reveals that 50 percent are not identified as at risk of dropping out of school the year they drop out, and over 75 percent are overage for grade. Hispanics make up the greatest proportion of dropouts, although Hispanic dropouts are not likely to be limited in English proficiency, or enrolled in bilingual or English as a second language programs. Dropouts have indicated in national studies that the reasons they leave school is low grades and dislike of school. Similar comments are made by the 50 percent of Texas dropouts who provided reasons for dropping out in 1992-93.

School districts and campuses in urban areas have higher dropout rates, regardless of campus size. Districts with lower student performance also reflect higher dropout rates. School districts that maintain above average operating costs per pupil have lower dropout rates, although the lowest spending districts do not have the highest dropout rates.

The longitudinal dropout rate for the 1992-93 school year under the previous methodology is 18.4 percent compared to 34 percent in 1987-88. The longitudinal dropout rate under the current or revised methodology is 15.8 percent for the 1992-93 school year. This rate remained fairly stable as it is projected over the next six years.

State Analysis

The Texas Education Agency is required by statute to prepare a biennial report of the current dropout rate of students in grades 7 - 12, plus projected cross-sectional and longitudinal dropout rates for these grades. This report provides dropout information for the 1992-93 school year. Included in the report are historical dropout information, an analysis of dropout rates based on school district characteristics, and additional information on characteristics of dropouts that has not previously been presented. The required state plan to reduce the dropout rate is provided in a separate document.

Dropout Definition, Data Collection, and Methodology

Dropout information is collected from school districts after the end of each school year. School districts report the number of dropouts through the Public Education Information Management System (PEIMS); instructions for identification of dropouts are included in the PEIMS Data Standards. As defined by statute, dropout information is collected for grades 7 - 12. A student is identified as a dropout if the individual is absent for 30 or more consecutive days without approved excuse or documented transfer or if he or she fails to reenroll during the first 30 consecutive school days in the following semester.

Students in the following categories are identified as dropouts.

- Students who drop out as defined by the 30 day absence rule stated in law
- Students who enter the military
- Students from special education, ungraded, or alternative education programs who drop out
- Students who leave school and enter a program not qualifying as an elementary/secondary school (i.e., cosmetology school)
- Students enrolled as migrants and whose whereabouts are unknown

Students in the following categories are not included in the dropout count.

- Students who die
- Students who drop out as defined by 30 the day absence rule before the 7th grade
- Students who are out of school for temporary periods with an approved excuse

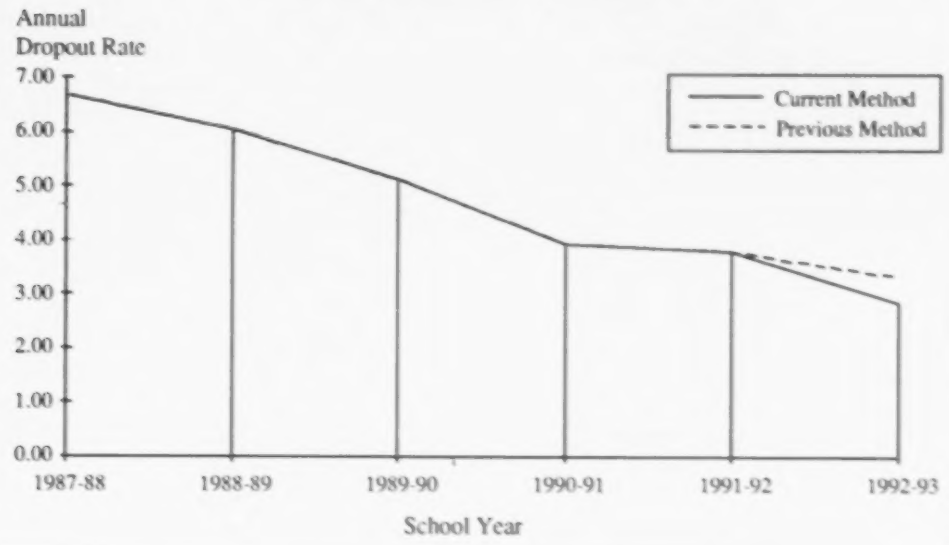
Students showing regular attendance at a state-approved alternative program
Students enrolled as migrants who have subsequent school enrollment records (a Migrant Student Record Transfer System education record is available)
Students known to have transferred to another public school, adult or alternative education program, or home schooling
Students who move to another grade level
Students who enroll in college early
Students transferred or assigned to another public institution or state-approved educational program

The most recent dropout information is reported for the 1992-93 school year. There have been some significant changes in the method of reporting dropouts since the collection of dropout data began in the 1987-88 school year. For the first three years of dropout data collection, the number of dropouts was computed directly from school district reports. Beginning in 1990-91, an automated statewide search was conducted to determine if any students reported as dropouts were enrolled in another school district within the state. These initial searches "recovered" over 4,000 dropouts each year. In July 1994, this same system of statewide recovery was applied to the 1992-93 dropout information. The total dropout count under this methodology is comparable to dropout counts reported since the statewide recovery process was begun in 1990-91. (For a listing of dropout counts under the previous methodology, see Appendix 2.)

Changes have been incorporated into the dropout recovery system and the methodology for determining the dropout rate as part of the 1993-94 Accountability Rating System for Texas Public Schools. The dropout recovery process was expanded to remove dropouts from the number submitted by school districts if the reported dropouts:

(1) have remained enrolled in public school somewhere in the state, according to the school district attendance and enrollment information provided through PEIMS;
(2) have received a General Educational Development (GED) certificate and appear on the GED information file at the time the recovery procedures are executed;
(3) have graduated within the last year;
(4) were expelled for criminal behavior occurring on school property or at school related functions (if the student was incarcerated, that student is not reported as a dropout); or
(5) were identified as a dropout at any time back to the 1990-91 school year. A student will be counted only once as a dropout in his or her public school tenure. This policy was made to encourage school districts to continue their efforts to recruit dropouts back into the classroom. First-time dropout identification applies to dropouts reported since the 1990-91 school year, the first year that student identification data were collected along with the dropout record.

Chart 1. Historical Dropout Rates



This expanded recovery process identified 8,317 students who were not included in the final 1992-93 dropout count. Of these recovered dropouts, 42 percent were enrolled in another public school, 34 percent were dropouts in a previous school year, and 23 percent had received a GED certificate at the time of recovery. Only one percent of recovered dropouts graduated over the course of the 1992-93 school year.

In addition to an expanded recovery process, the methodology for determining the dropout rate was changed. The dropout rate is calculated by dividing the number of dropouts by the total enrollment in grades 7 - 12 for the same school year. Fall enrollment — the number of students enrolled on the October PEIMS reporting date — has been used to calculate dropout rates. Attendance data collected for the first time for the 1992-93 school year allowed computation of cumulative enrollment. Cumulative enrollment is the total count of all students who were enrolled at any time during the school year. This number more closely parallels the number of dropouts counted for that entire school year. The 1992-93 annual or event dropout rate under this methodology is calculated by dividing the total number of dropouts by the cumulative enrollment in grades 7 - 12. Although this rate is less comparable to prior years under the previous methodology, it provides a more accurate reflection of the dropout situation and more comparable data for comparison between districts and campuses. Throughout this report all analyses are based on this current expanded methodology for 1992-93 dropouts unless otherwise stated. Chart 1 shows a comparison of the dropout rates under the previous and current methodologies for 1992-93.

Chart 2. Historical Dropout Totals					
1987-88	**1988-89**	**1989-90**	**1990-91**	**1991-92**	**1992-93**
91,307	82,325	70,040	53,965	53,420	43,402
Percent Change From Previous Year	-9.8%	-14.9%	-23.0%	-1.0%	-18.8%

The estimated longitudinal dropout rate calculation has not changed. A longitudinal rate may be calculated by dividing the number of students who drop out over several years, such as from 7th to 12th grade, by the number of students who entered school during the beginning year of the period under study. Since Texas has only been counting dropouts since 1987-88, a true longitudinal dropout rate cannot be calculated until the 1995-96 school year. Therefore, Texas' estimated longitudinal rate is calculated by subtracting the annual rate as a percentage of 1.00, and raising the resulting retention rate to the sixth power. The retention rate is then subtracted from 1.00 for the final estimated longitudinal dropout rate.

Trends in State Dropout Rates

The total number of dropouts for the 1992-93 school year is 43,402. There has been a steady decline in the number of dropouts reported over the last six years. School districts reported over 90,000 dropouts in school year 1987-88. After six years, this number has been reduced by over 50 percent. Chart 2 shows the total number of dropouts since the first year of dropout reporting and the percent decline over the previous year. A portion of the reduction in the number of dropouts reported during the first few years of dropout data collection is attributed to improvements in school district student tracking systems. The 1990-91 and 1992-93 reductions reflect, in part, enhancements to the statewide dropout recovery system.

Both the annual and longitudinal dropout rates for each year are shown on Chart 3. The 1992-93 final annual dropout rate is 2.8 percent. This rate reflects a significant decline in the dropout rate since 1987-88. The estimated longitudinal dropout rate for the same year is 15.8 percent. This means an estimated 15.8 percent of the 1987-88 seventh grade class dropped out of school before graduation. The 1992-93 rate represents a vast improvement over the 1987-88 longitudinal rate of 34.0 percent.

The dropout rate among certain ethnic minorities has been and remains significantly higher than the overall dropout rate. The annual dropout rate of Hispanic students for the 1992-93 school year is 4.2 percent. African American students have a

Other	39,931	814	1.9%	2.0%	11.6%
Total	1,533,197	43,402	100.0%	2.8%	15.8%

Beginning in 1990-91, an automated statewide search was conducted to recover any dropouts who were enrolled in another Texas school district. This statewide dropout recovery system was expanded in 1992-93. Also in 1992-93, cumulative enrollment was used to calculate dropout rates for the first time, rather than fall enrollment.

3.6 percent annual dropout rate. Although these rates have declined, each year Hispanic and African American students have consistently had the highest rates among all ethnic groups. All other student groups have a dropout rate that is lower than the state overall rate. Minority students have represented a higher percentage

Chart 4. Percent of Total Dropouts
School Year 1987-88 to 1992-93

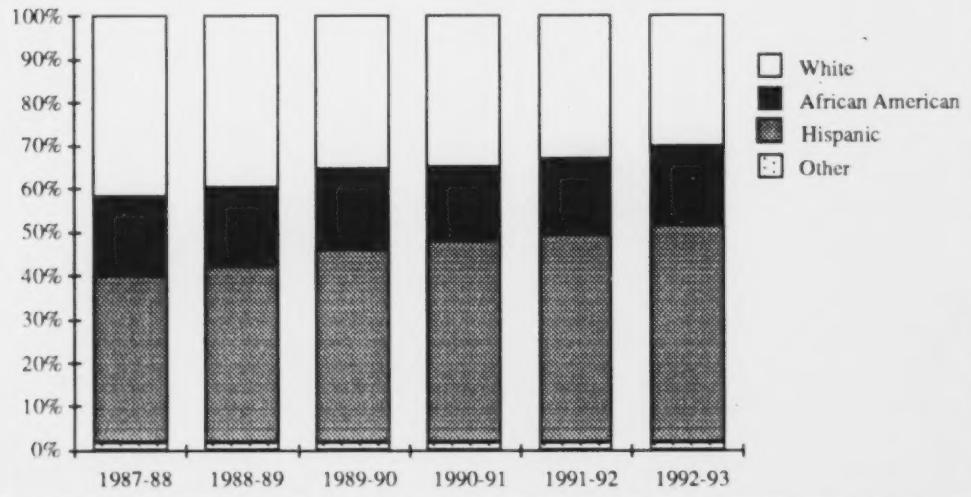

Chart 5. Historical Dropout Totals by Ethnicity

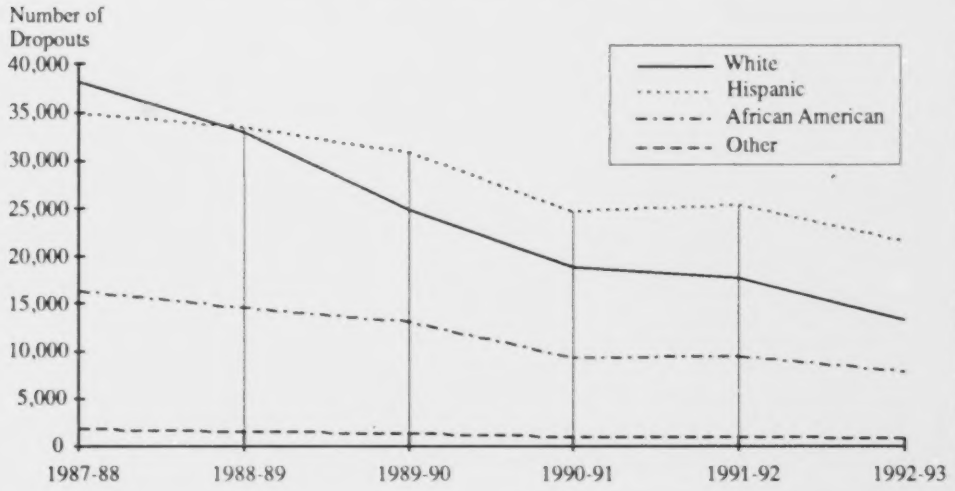

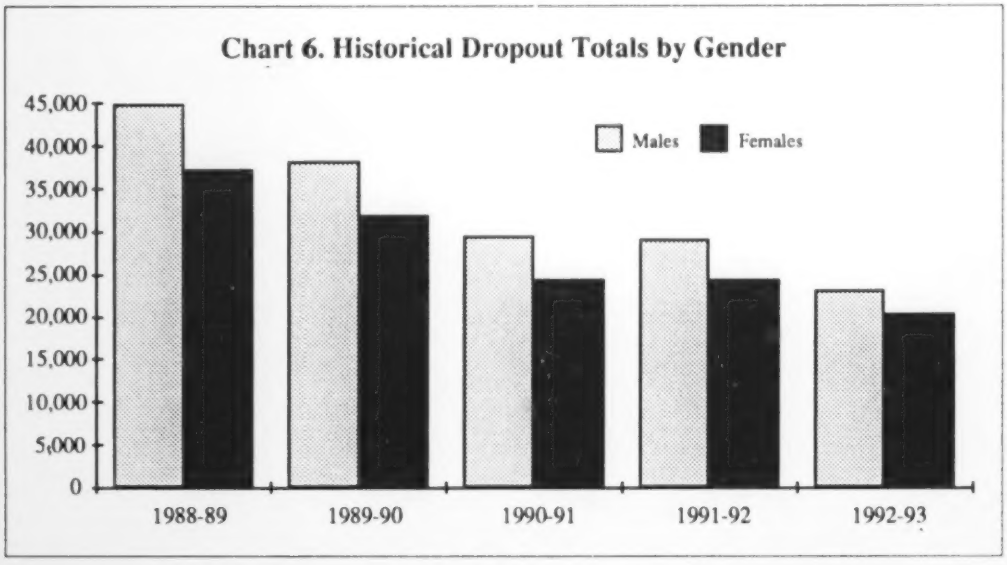

of total dropouts since the 1987-88 school year. Since the 1988-89 school year, Hispanic students make up the greatest percentage of total dropouts.

The longitudinal rates for Hispanic and African American students are also higher than for other groups. The longitudinal rate for Hispanic students is 22.6 percent and for African American students is 19.9 percent. The achievement of a five percent longitudinal rate is still a significant challenge for these groups of students.

Despite the high dropout rates, the total number of dropouts has declined among all ethnic groups. Chart 5 shows the progression of decrease in the number of dropouts for each ethnic group. The decrease in dropouts has narrowed the gap between minority and white student dropout rates. In 1987-88, the dropout rate for minorities students was 8.6 percent while white students had a 5.2 percent dropout rate. The difference, or gap, was 3.4 percentage points. The current dropout count produces a gap of minority and white student dropout rates of 2.2 percentage points. The decrease in the number of minority dropouts has been the primary cause of this reduction. At the same time, enrollment of minority students over this period has increased at a higher rate than that of white students. The result is a reduction in the gap between minority and white dropout rates.

Dropout information over the last six years shows that slightly more males drop out each year than females, as shown on Chart 6. The 1992-93 dropout totals indicate that this is also the case among each ethnic group. Charts 7 through 9 on Page 10 show the distribution of dropouts by ethnicity, gender, and grade. Hispanic males

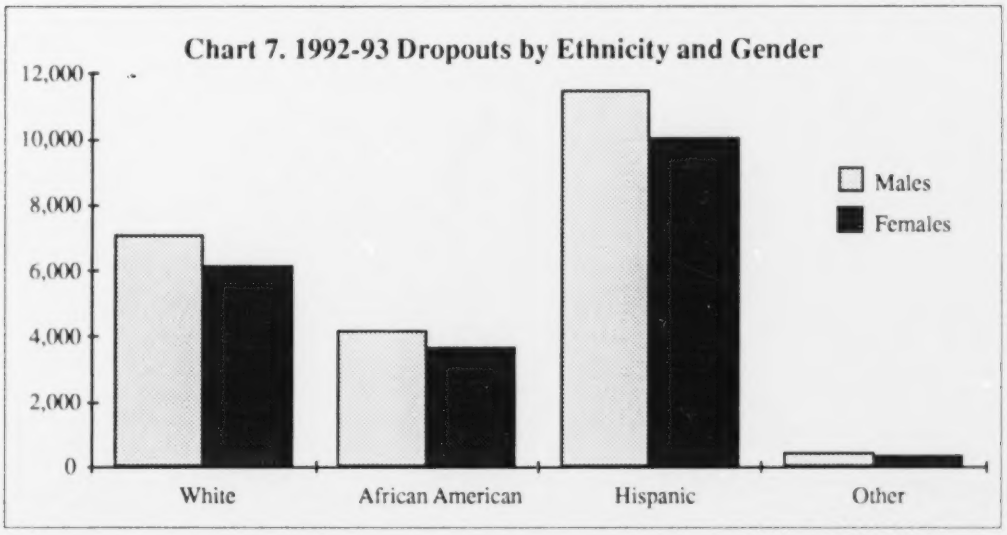

Chart 8. Ranking of Dropout Rates by Gender and Ethnicity

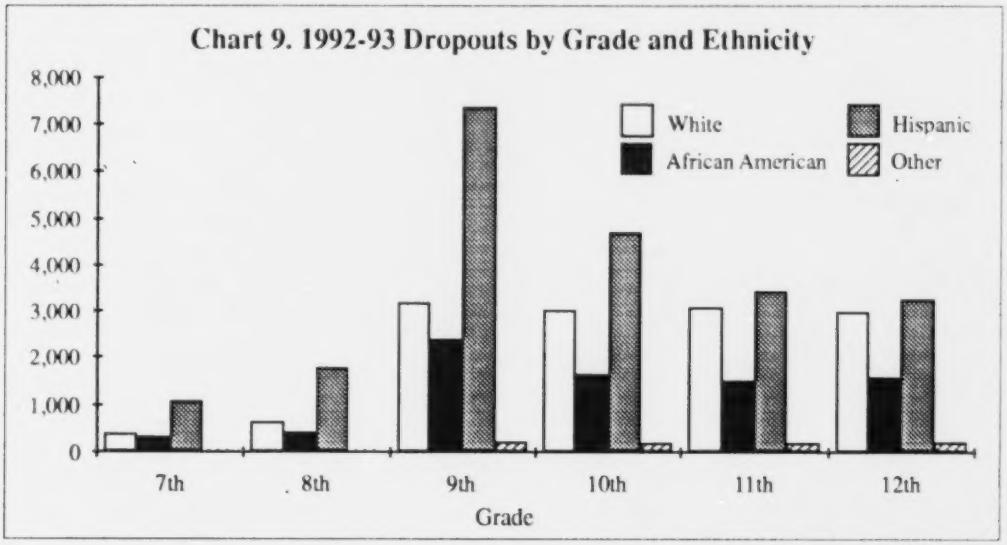
Rank	Ethnic Group	Annual Rate	Rank	Ethnic Group	Annual Rate
1	Hispanic Male	4.3%	5	Other Male	2.2%
2	Hispanic Female	4.0%	6	Other Female	1.8%
3	Black Male	3.8%	7	White Male	1.8%
4	Black Female	3.4%	8	White Female	1.7%



have the highest dropout rate of all ethnic and gender groups, while the number of dropouts is greatest at the 9th grade level for all groups.

Chart 10 lists the dropout rates by grade from the 1987-88 to the 1992-93 school year. Dropouts departing from school in the 9th grade reflected the highest dropout rate for the first five years data were collected. The current year of information shows an equally high rate in the 12th grade. This is explained as the ethnicity and gender of grade level dropouts is examined.

Although males drop out at a higher rate in the 9th grade, the greatest rate of female dropouts is found in the 12th grade. Among Hispanic dropouts, the greatest rate is found in the 9th grade. This trend has remained consistent among Hispanic male dropouts. However, the number of Hispanic female dropouts in the 12th grade has increased, and the 12th grade and 9th grade Hispanic female dropout rates are very similar. Although the highest number of African American dropouts is in the 9th grade, for the past two years the highest dropout rates for African American students have been in the 12th grade. The number of African American female dropouts remained virtually the same for the past two years while other grades and ethnic groups showed decreases.

Characteristics of Dropouts

A study by the National Center for Education Statistics (NCES) that tracked high school dropouts nationally identified the following general characteristics of students

Chart 10. Historical Dropout Rates by Grade

Grade	1987-88	1988-89	1989-90	1990-91	1991-92	1992-93
7	3.3%	2.6%	1.9%	0.9%	0.8%	0.6%
8	4.9%	3.6%	3.1%	1.7%	1.4%	1.0%
9	10.0%	9.2%	7.9%	6.2%	5.6%	4.1%
10	8.3%	8.2%	6.8%	5.5%	5.5%	3.8%
11	7.6%	7.1%	6.4%	5.2%	5.1%	3.9%
12	5.8%	5.7%	4.9%	4.7%	5.1%	4.1%
Total	**6.7%**	**6.1%**	**5.1%**	**3.9%**	**3.8%**	**2.8%**
Estimated Longitudinal Rate	34.0%	31.3%	27.2%	21.4%	20.7%	15.8%

who drop out of school: economically disadvantaged, ethnic minority, low academic achievement, and enrollment in a nonacademic curriculum. Texas dropout information provides total number of dropouts for each of these characteristics for at least one of the last six years. Other characteristics noted in the NCES study are: unsatisfactory relationship with family, dissatisfaction with school, delinquent or truant behavior, low self-esteem, the need to work, and early pregnancy or marriage. Some of these same characteristics of dropouts have been identified among Texas dropouts for most of the last six years since the first collection of dropout information. Chart 11 shows three characteristics of dropouts related to those identified at the national level, and the percent of total for each group.

Dropouts have been identified as economically disadvantaged since 1988-89. Since that year, there has been a decline in the number of economically disadvantaged dropouts similar to the decline in total dropouts. However, the percent of both grade 7-12 enrollment and total dropouts identified as economically disadvantaged has increased slightly over the last few years. Both percentages are very similar, meaning the dropout rate for economically disadvantaged students is only slightly higher than the state rate.

Chart 11. Historical Dropout Characteristics

	1987-88	1988-89	1989-90	1990-91	1991-92	1992-93

Student At-Risk Identification

The complexity of the process of identifying and exiting students from risk status became evident in the early stages of the study. The term at risk, when applied in an educational context, is inappropriately viewed as a technical term. Although it originated as a technical term, its predictive power and accuracy in identifying potential dropouts is a relative rather than absolute condition. Individual variability necessitates local flexibility. Districts are allowed to remove a student from the at-risk list; in practice, very few schools in this study appear to exercise this option.

Identifying students as at risk no longer focuses on a type of student in a particular situation, because any student can now be in a situation that puts them at risk. At risk is a situation no longer exclusive to the poor, the minorities, and the low achievers; most adolescents can be at risk.

Final Report of a Study of the Impact of Educational Reform on Students At Risk in Texas, March 1994

Currently, an accurate measure of the academic achievement of dropouts is not available. However, information on the number of dropouts identified as overage for grade can be shown. It is safe to assume that students who are not on the grade level for their age group have been retained in at least one grade before dropping out. The number of dropouts overage for grade has represented a substantial portion of all dropouts since 1988-89. In 1992-93, 79.0 percent of dropouts were overage for grade compared to 34.2 percent of all grade 7-12 students.

School districts are required to identify students in grades 7 - 12 as at risk of school failure or of dropping out. A student is defined as at risk if the student:

(1) was retained at least once in grades 1- 6 and is still unable to master their current grade level,
(2) is at least two years below grade level in reading or mathematics,
(3) has failed at least two courses and is not expected to graduate within four years of 9th grade entrance, or
(4) has failed at least one section of the most recent grade 7 - 12 Texas Assessment of Academic Skills (TAAS) exam.

Chart 12. Historical Dropout Characteristics

	1990-91	1991-92	1992-93
Limited English Proficiency			
Grade 7-12 Enrollment	76,418	86,842	96,629
Percent of Total	5.6%	6.2%	6.3%
Dropouts	**4,837**	**5,339**	**5,019**
Percent of Dropouts	**9.0%**	**10.0%**	**11.6%**
Bilingual/English as a Second Language			
Grade 7-12 Enrollment	66,045	68,875	73,435
Percent of Total	4.8%	4.9%	4.8%
Dropouts	**4,187**	**4,234**	**3,957**
Percent of Dropouts	**7.8%**	**7.9%**	**9.1%**

Surprisingly, only 50 percent of 1992-93 dropouts were identified as at risk of dropping out during the year they dropped out of school. This percentage is consistent with the findings of a recent study of the effects of education reform on students identified as at risk of dropping out. Case studies were conducted as part of that study and over half of the schools reported similar results: approximately half of all students who dropped out during the 1989-90 school year were identified as being at risk before dropping out of school. About 1,800 students identified as at risk were selected for the longitudinal component of the study during 1989 and 1990. School counselors were unable to identify support services for 50 percent of those who dropped out. The study report suggests that the utility of the term "at risk" in directing resources to students remains questionable.

As Chart 11 on Page 12 shows, the number of dropouts who were receiving special education services the year they dropped out has decreased steadily since 1987-88, while the number of students receiving special education services has increased. The change in methodology to use of cumulative enrollment is also evident in the special education numbers because students are referred for special education services throughout the school year. About 10.6 percent of students enrolled in grades 7-12 receive special education services, but only 8.6 percent of dropouts were receiving special education services in 1992-93. This results in a dropout rate for students receiving special education services that is lower than the state rate.

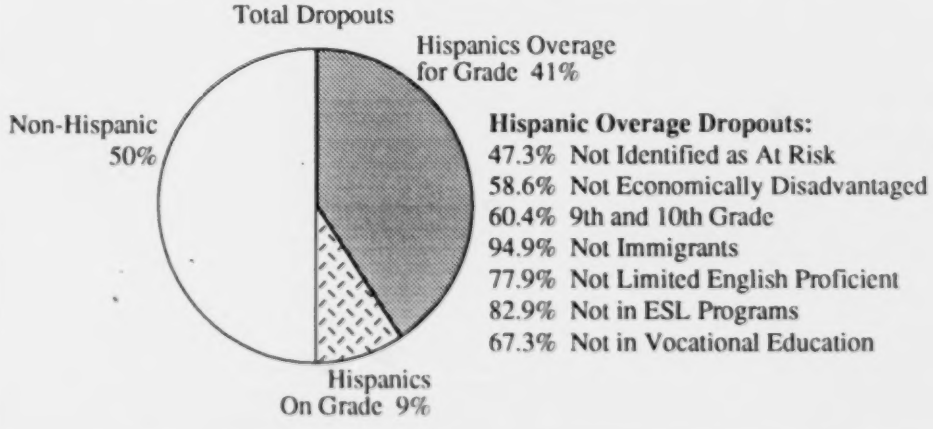
NCES defines a nonacademic curriculum as enrollment in a vocational education program. In 1992-93, 15,712 or 36.2 percent of Texas dropouts were enrolled in vocational education courses the year they dropped out of school. By comparison, 30.5 percent of all students were enrolled in vocational education courses. This identification was not made in prior years.

One of the several recommendations made in the 1993-95 state plan to reduce the dropout rate was the provision of effective instructional programs for immigrant students with limited English proficiency (LEP) designed to meet the unique needs of these students with diverse linguistic, cultural, and educational backgrounds. A large percentage of dropouts are of Hispanic origin. There is a much smaller percentage of dropouts identified as LEP or participating in bilingual or English as a second language (ESL) programs. However, these groups have increased as a percentage of all dropouts since 1990-91 as shown in Chart 12. Students with limited English proficiency and bilingual/ESL students make up a considerably larger percent of dropouts than grade 7-12 enrollment. The immigrant status of each student is available for dropouts. This identifying information was collected from school districts for the first time in 1992-93. Nearly three percent of all dropouts are identified as immigrants.

Profile of a Dropout

A review of the last six years of dropout information reveals that a typical dropout in Texas is Hispanic, overage for grade by at least one year, in the 9th or 10th grade at the time of school departure, and is probably male. As Chart 13 shows, this student has a fifty-fifty chance of having been identified as at risk of dropping out, and a slightly lower chance of being economically disadvantaged. The dropout is most likely not an immigrant, not limited in English, and therefore not enrolled in an ESL program. The dropout is also not likely to be part of the vocational education program.

Chart 13. Profile of Hispanic Overage Dropouts — 1992-93



Total Dropouts
Hispanics Overage for Grade 41%
Non-Hispanic 50%
Hispanics On Grade 9%
Hispanic Overage Dropouts:
47.3% Not Identified as At Risk
58.6% Not Economically Disadvantaged
60.4% 9th and 10th Grade
94.9% Not Immigrants
77.9% Not Limited English Proficient
82.9% Not in ESL Programs
67.3% Not in Vocational Education

The NCES national study of dropouts mentioned earlier also reported the reasons for leaving school cited most often by males and females. Males most often cite poor grades and dislike of school as the reason they dropped out of school. Females mention marriage as the most common reason, followed by dislike of school.

Texas school districts are required to indicate a reason for dropping out for each student reported. For the past six years, the reason for nearly 50 percent of all dropouts is unknown. Of those who do report a reason, 26 percent indicate poor attendance as the primary reason for dropping out.

School Characteristics

Texas schools differ greatly based on characteristics such as community type, school size, student performance, and expenditures, and the dropout rates of schools among these categories differ as well. (For a listing of all school districts in Texas, see Appendix 1.)

The dropout rates for school districts by school district community type are shown on Chart 14. The highest dropout rates are found in school districts located in urban areas, the lowest in rural areas. Texas student information shows that both minority students and economically disadvantaged students are found in greater numbers in the urban areas, which may partially explain the difference in rates.

Minority teachers are also found in greater numbers in urban areas, which explains the higher dropout rates among school districts and campuses that have a greater percentage of minorities in their teaching force. Chart 15 shows this trend among school districts.

School districts with the greatest enrollment of students have consistently higher dropout rates than smaller school districts. Most large school districts are located in

Chart 14. 1992-93 Dropouts by District Type

Number of Districts	District Type	Total Dropouts	Percent of Dropouts	Annual Dropout Rate
34	Urban	21,656	49.9%	3.7%
138	Suburban	11,855	27.3%	2.0%
386	Town	8,910	20.5%	2.2%
467	Rural	981	2.3%	1.2%
1,025	TOTAL	43,402	100.0%	2.8%

urban areas. The relationship between dropout rates and campus size does not show the same pattern. Chart 16 indicates that although campuses that serve over 1,000 students have a higher than average dropout rate, the rate among the smallest campuses is even greater. Campuses with less than 250 students have a higher than average dropout rate. Only half of the 440 small campuses are in rural areas, indicating that small campuses in nonrural areas increase the average dropout rate for this group.

Chart 15. 1992-93 Dropouts by Percent Minority Teachers

Number of Districts	Percent Minority Teachers	Total Dropouts	Percent of Dropouts	Annual Dropout Rate
576	Under 5%	6,735	15.5%	1.6%
185	5% to Under 10%	5,322	12.3%	1.8%

190	Over $5,539	484	1.1%	1.4%
1,025	TOTAL	43,402	100.0%	2.8%

Chart 19. 1992-93 Dropout Rates by Average Student/Counselor Ratio						
		Dropout Rates				
Number of Districts	Student/Counselor Ratio	Total	White	Hispanic	African American	Other
357	Under 382	2.4%	1.2%	3.2%	2.8%	1.4%
223	382 to 466	2.6%	1.6%	4.0%	3.3%	2.0%
221	466 to 576	2.9%	1.8%	4.6%	3.5%	2.1%
223	Over 576	2.2%	1.6%	3.2%	2.2%	1.7%

Chart 17 on Page 17 illustrates dropout rates by student performance. School districts were grouped based on percent of students passing all Texas Assessment of Academic Skills (TAAS) tests taken. The group of districts with the lowest percent passing all tests has a greater number of dropouts and a higher dropout rate than other groups. These 257 districts with under 45 percent of their students passing all TAAS tests have 48 percent of all dropouts.

The resources of school districts and campuses have been considered a factor in the ability to supply needed support services for students at risk of dropping out of school. Chart 18 shows dropout rates among school districts with different levels of operating cost per pupil. School districts with average and below average operating costs per pupil serve a large proportion of the state total enrollment and, not surprisingly, a similarly large percentage of the total dropouts. School districts with the highest operating costs per pupil have the lowest dropout rate of 1.4 percent.

School counselors have become the recent focus of a follow-up to the study of students at risk. That study revealed discrepancies between the role of the counselor as envisioned by state and national models and their actual duties. School counselors are often involved in identifying students as at risk in addition to providing guidance and counseling services to potential dropouts before school failure. The average ratio of students to counselors on school campuses is 476. Chart 19 shows the

Chart 20. Projected Dropout Rates by Grade							
Grade	**1992-93**	**1993-94**	**1994-95**	**1995-96**	**1996-97**	**1997-98**	**1998-99**
7	0.6%	0.6%	0.6%	0.6%	0.6%	0.6%	0.6%
8	1.0%	1.0%	1.0%	1.0%	1.1%	1.1%	1.1%

Estimated Longitudinal Rate	15.8%	16.1%	16.1%	16.1%	16.1%	16.1%	16.1%

dropout rates of school districts by student/counselor ratio. Although there is not much variation in the dropout rate by student/counselor ratio, the lowest dropout rates for white students are found among school districts with the lowest student/counselor ratios. Counselors in these districts serve the smallest number of students compared to other school districts in the state. Dropout rates for Hispanic and African American students do not show any pattern. However, school districts with student/counselor ratios between 466 and 576 have the highest dropout rates among Hispanics and African American students.

Projected Cross Sectional and Longitudinal Dropout Rates

Projected dropout rates by grade are calculated by taking the population for each grade and ethnic group and incrementing the grade level for each projected year. That is, the 1993-94 rate represents all students in grades 6 through 11 in 1992-93, with the grade adjusted appropriately to represent grades 7 - 12, and the 1992-93 dropout rate applied to each grade. This is determined for each cohort through year 1998-99. This calculation is based on the assumption that current dropout rates will remain constant. The legislature, State Board of Education, and commissioner of education all advocate reduction of the dropout rate as a goal.

Chart 20 shows the projected grade level (cross sectional) and longitudinal dropout rates for Texas. The current longitudinal rate of 15.8 percent changes slightly through 1998-99. Grade level dropout rates do reflect the higher dropout rates in the 12th grade, a trend seen for the first time this year.

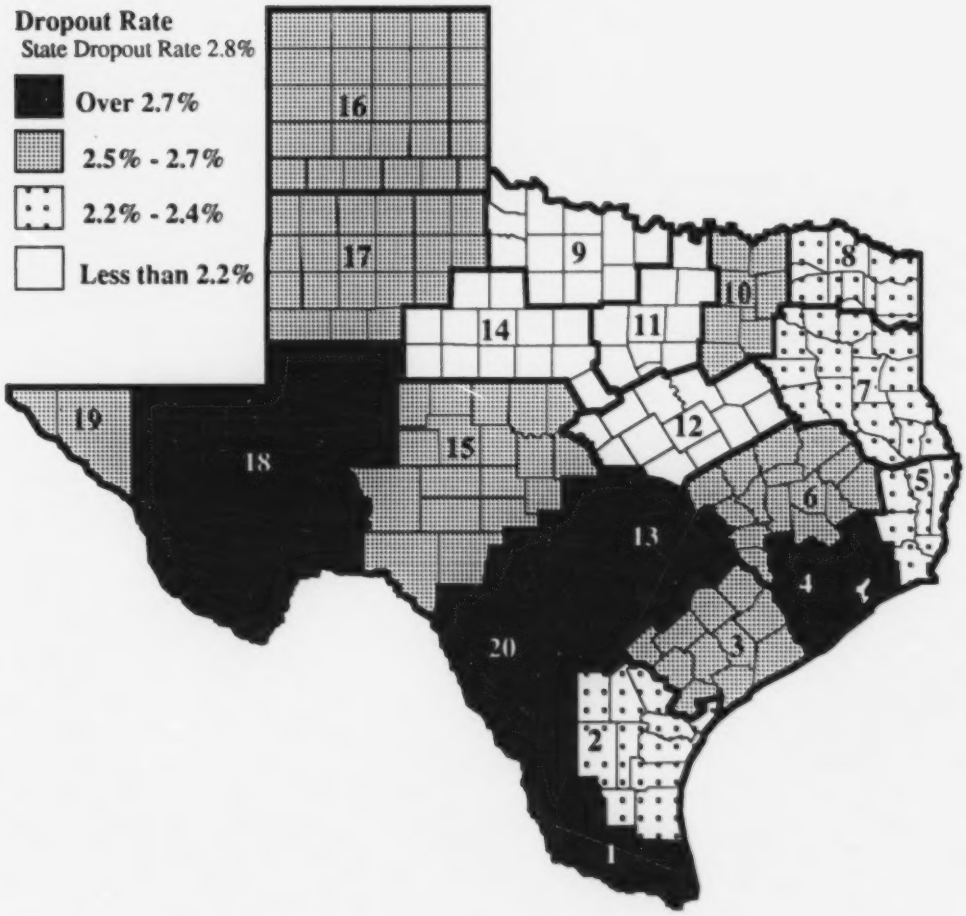
Dropout Rates by Education Service Center (ESC) Region



COMPLIANCE STATEMENT

TITLE VI, CIVIL RIGHTS ACT OF 1964; THE MODIFIED COURT ORDER, CIVIL ACTION 5281, FEDERAL DISTRICT COURT, EASTERN DISTRICT OF TEXAS, TYLER DIVISION

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

(1) acceptance policies on student transfers from other school districts;

(2) operation of school bus routes or runs on a non-segregated basis;

(3) nondiscrimination in extracurricular activities and the use of school facilities;

(4) nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;

(5) enrollment and assignment of students without discrimination on the basis of race, color, or national origin;

(6) nondiscriminatory practices relating to the use of a student's first language; and

(7) evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

TITLE VII, CIVIL RIGHTS ACT OF 1964 AS AMENDED; EXECUTIVE ORDERS 11246 AND 11375; TITLE IX, EDUCATION AMENDMENTS; REHABILITATION ACT OF 1973 AS AMENDED; 1974 AMENDMENTS TO THE WAGE-HOUR LAW EXPANDING THE AGE DISCRIMINATION IN EMPLOYMENT ACT OF 1967; VIETNAM ERA VETERANS READJUSTMENT ASSISTANCE ACT OF 1972 AS AMENDED; AMERICAN DISABILITIES ACT OF 1990; AND THE CIVIL RIGHTS ACT OF 1991.

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all Federal and State laws and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, handicap, age, or veteran status or a disability requiring accommodation (except where age, sex, or handicap constitute a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Employment Opportunity/Affirmative Action employer.
